

PragerMetis Technology

Cybersecurity • Risk Intelligence • Regulatory Compliance

Risk Assessment • Threat Monitoring • Threat Training • Vulnerability Testing • Incident Response • Forensic Analysis • Remediation

In light of recent events, all firms, organizations and individuals, globally, are asking themselves, "Am I going to be proactive related to my cybersecurity readiness or reactive when the inevitable effects of a cyber attack forces me to change the manner in which I have been addressing this situation."

- Peter Fiorillo

The Benefits:

- Industry leading, cost-effective end-to-end agnostic integrated solution developed by industry leading partners with measurable ROI
- Unique & proprietary methodologies that integrate into existing client platforms driving down the cost to use, train and update
- Subject matter and related industry expertise retained globally over decades provide solutions that create measurable savings to clients
- Management can be proactive and identify potential cyber-risk for which they are accountable rather than draining resources reacting
- Provides threat monitoring, threat hunting and threat training for each person in the company resulting in significant savings over time
- Offers an immediately deployable, solution in which initial results are delivered quickly containing litigation, remediation and disruption costs
- Top forensic and incident response talent based around the world to react immediately
- Leverages a proven five step process to access your cybersecurity risk exposure that is frictionless and ties into your existing technology

Are you prepared?

There is no question that cybercrime is a rapidly growing threat to anyone who uses a computer, cell phone or the Internet. Many companies are struggling to keep pace with evolving and covert cybersecurity threats as offenders are becoming extremely intelligent.

These organizations are turning to PragerMetis Technology, LLC, a market leader in cybersecurity, risk intelligence and regulatory compliance, as PragerMetis has been solving problems for its clients since 1919. PragerMetis International has office locations around the globe serving over 12,000 clients worldwide.

PragerMetis Technology uses a flexible, scalable and fully integrated suite of products and services to help firms prepare in advance of a cyber event or to respond once an incident has been identified. This unique and proprietary "Cybersecurity Integrated Solution" provides a blended integration of leading edge technology, tools and products combined with subject-matter-expertise, and industry knowledge that utilizes the best practices and most effective threat monitoring, hunting and training methods to protect its clients.

It was estimated that over 300,000 computers, in over 150 countries were affected by the recent WannaCry worm released on Friday, May 12, 2017. The attacks had a much wider impact than anything ever seen before. These types of attacks will continue to be a growing threat to companies, organizations and individuals of all sizes. Doing nothing is not an option.

Upon notification of this attack, PragerMetis and its affiliated partners responded quickly to its client base currently utilizing its suite of cybersecurity integrated solutions while the remediation and patches were quickly deployed to mitigate the impact of this global event. This was a significant wake-up call to many hospitals, municipalities, universities, financial institutions, energy, transportation, manufacturing and professional services organizations as well as individual people, who work from home.

The unique value proposition of PragerMetis Technology is the manner in which each component of its "Cybersecurity Integrated Solution" leverages across the entire organization where protections and notifications occur at every level in the company on a continuous basis. With strong financial services, healthcare, global energy, transportation, technology, manufacturing, retail, government, public sector and education industry experience, let PragerMetis assist you.

PragerMetis Technology

Cybersecurity • Risk Intelligence • Regulatory Compliance

Financial • Healthcare • Energy • Technology • Education • Retail • Entertainment • Public Sector • Manufacturing • Transportation

Cybersecurity & Risk Intelligence Platform, Products & Services:

- Access to complete end-to-end “Cybersecurity Integrated Solution” platform
- 24/7 threat monitoring, threat hunting and threat analysis
- Cybersecurity gap analysis
- Automated threat training and education modules
- Cybersecurity risk assessment (see automated tool below)
- Penetration & Vulnerability testing (industry leading proprietary methodology)
- Security information & event monitoring services (SIEM)
- Breach response legal support and insurance services
- Forensic analysis & risk intelligence services
- Interim chief information security officer (CISO) services
- Turn-key cybersecurity written policies, procedures and best practices
- Incident response plan, policies and procedures
- Annual written statement certifying compliance
- General & third-party vendor assessments
- Risk control & self-assessment (RCSA)
- Key risk indicator monitoring (KRI)
- Scenario analysis with resource allocation analysis
- Loss data benchmarking & event monitoring
- Risk profiling & risk appetite analysis
- Cybersecurity data collection, benchmarking and analysis
- Regulatory compliance & audit review services

Highlights of our Automated Cybersecurity Risk Assessment Capability:

- Leading fully automated cybersecurity risk assessment tool in the marketplace used by companies of all sizes
- Provides a holistic view of enterprise-wide information security by business segment or entity
- Loaded with 34 international information security standards & frameworks, others easily loaded
- These standards & frameworks include: NIST, ISO, FFIEC, HIPAA/ HITECH, PCI DSS, AICPA TSC, COBIT, FERPA, FedRAMP
- Compliance reviews performed against most standards and readiness assessments in advance of various types of formal audits, compliance or regulatory reviews
- SAAS based tool or available “On-Premise” with scoring and rating metrics for benchmarking and comparative analysis
- Generates automated reports for all levels in a company identifying controls, weaknesses and recommendations
- Adds an entire new level of cybersecurity risk assessment that most firms have failed to achieve to date
- Automates controls for assessing, evaluating, and reporting by location and jurisdiction addressing regulatory expectations
- Controls and evaluations are updated based on information data bases accumulated and learned from real world breaches
- Currently being used by several regulators now in private practice because of the unique & proprietary “cross-walk” capability
